EDUCATION

University of Florida

Spring 2026

Bachelor of Science in Computer Science Engineering

GPA: 3.55

Minor in Digital Arts and Sciences

Scholarships: Bright Futures Florida Academic Scholars Award, Pelican Bay Rotary Club, Moose Lodge Heart of the Community Award

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, HTML/CSS, C++, MATLAB

Tools/Technologies: Git, Amazon Web Services, React, Node.js, PostgreSQL, MongoDB, DigitalOcean, Docker, Codex / Copilot

INTERNSHIPS

KIDZHACK - Software Engineering Intern

Summer, 2025

AWS, Python, JavaScript, HTML/CSS, Angular, Git

Remote

- Developed features for a student wellness platform that helps teachers monitor students' emotional well being
- Implemented role-based authorization with custom AWS Lambda Authorizers, saving administrators **167+** hours annually
- Refactored the entire UI from desktop only functionality to also work cleanly on mobile browsers
- Operated in an Agile environment using Jira to manage sprint tasks, track progress, and to ensure timely delivery of features

Weekly Cleaning Quotes - Full Stack Software Engineer Intern

Summer, 2024

Python, Flask, HTML/CSS, Digital Ocean

Remote

- Developed a web app for a small cleaning business that provides local cost estimates for residential cleaning services
- Built a Python and Flask backend while integrating RentCast API data from more than **140 million** property records
- Utilized Bootstrap for mobile friendly design, CSS for branding and styling, and HTML for input validation
- Registered a domain on Namecheap and deployed the website on Digital Ocean with HTTPS encryption, ensuring secure and reliable hosting

PROJECTS

Limelyte - Concert Review Platform - Full Stack Developer

Summer, 2026

TypeScript, React, Next.js, PostgreSQL (Supabase), Vercel, Setlist.fm API, Last.fm API, Spotify API

Gainesville, FL

- Developed a full-stack web app where up to **50,000** monthly users can discover and review concerts
- Implemented concert reviews, social feeds, playlists, music festival lists, and personalized song recommendations based on user interactions
- Integrated data from more than **9 million** live performances to power concert search and discovery
- Designed responsive mobile and desktop interfaces across all core user workflows

INVOLVEMENT

University of Florida Open Source Club

Fall 2022 – June 2026

Contributor

Gainesville, FL

- Contributed to a cross-platform mobile app that improves traditional alarm clock functionality by introducing penalties for oversleeping
- Implemented a dark mode toggle using React state management, enabling dynamic theme switching across the user interface

AWARDS

Certifications & Awards: NAT certification in Python Programming 2022, College Board National Hispanic Recognition Winner 2021
