EDUCATION

University of Florida

Spring 2026

Bachelor of Science in Computer Science Engineering

GPA: 3.55

Minor in Digital Arts and Sciences

Scholarships: Bright Futures Florida Academic Scholars Award, Pelican Bay Rotary Club, Moose Lodge Heart of the Community Award

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL, HTML/CSS, C++, MATLAB

Tools/Technologies: Amazon Web Services, Git, Copilot, React, Node, MongoDB, DigitalOcean, Ubuntu, Flask

INTERSHIPS

KIDZHACK - Software Engineering Intern

Summer, 2025

AWS, Python, HTML/CSS, JavaScript, Angular, Git

Remote

- Contributed to a local company's website for surveying elementary school students to help teachers gauge their emotions
- Developed role-based authentication for teachers, students, and faculty via custom AWS Lambda Authorizers
- Refactored the entire UI from desktop only functionality to also work cleanly on mobile browsers
- Operated in an Agile environment using Jira to manage sprint tasks, track progress, and to ensure timely delivery of features

PROJECTS

Weekly Cleaning Quotes - Full Stack Software Engineer

Summer, 2024

Python, HTML/CSS, Flask, Digital Ocean

Remote

- Developed a web app for a small cleaning business that provides local cost estimates for residential cleaning services
- Created a backend with Python and Flask to handle user input and API requests for housing information
- Utilized Bootstrap for mobile friendly design, CSS for branding and styling, and HTML for input validation
- Registered a domain on Namecheap and deployed the website on Digital Ocean with HTTPS encryption, ensuring secure and reliable hosting

Vehicle Venue Car Rental Application - Team Developer

Spring, 2024

Python (PyQt, PyMongo), MongoDB

Gainesville, FL

- Collaborated in a team of four to develop a command-line program that gives unique car rental options based on availability and location, with distinct user roles for administrators, employees, and customers
- Integrated MongoDB with PyMongo to create a robust backend, supporting real-time car rental management across multiple locations
- Developed an interactive UI with PyQt6 with dynamic car filtering supporting role-based access control, ensuring users only see data relevant to their roles

INVOLVEMENT

University of Florida Open Source Club

Fall 2022 – Present

Contributor

Gainesville, FL

- Contributed to a cross-platform mobile app that improves traditional alarm clock functionality by introducing penalties for oversleeping
- Implemented a dark mode toggle in JavaScript with React's state management, enabling dynamic front-end control and real-time UI re-rendering

AWARDS

Certifications & Awards: NAT certification in Python Programming 2022, College Board National Hispanic Recognition Winner 2021
